StimConnect[™]

for PACE® Model 203 with Unipolar Terminals

Extension Cables for Surgical Pacing Applications

PACE® Model 203 is primarily used for temporary surgical cardiac pacing applications. Surgical wires (temporary myocardial electrodes or heart wires) for temporary pacing are either equipped with 2 mm exposed (naked) plug pins or 0.9 mm pins/ needles. Following StimConnect® extension cables are recommended for PACE® Model 203 with unipolar terminals.

Disposable cables are for single use, reusable extension cables can be sterilized 25 times by ethylene oxide or steam. A punch card allows the identification of the sterilization cycles.

Disposable Extension Cable StimConnect™ Connection Connection **Surgical Pacing Pacemaker** Pacemaker- Side Patient-Side Electrode Adapters with exposed (naked) 2 mm pins Article No: 81987BL (blue) / 81987 WS (white) Exposed (naked) 0.9 mm Plugs with touch protected Connects exposed (naked) pins with pins/breaking needles 2 mm pins fitting unipolar terminals of PACE® Model 203 diameter between 0.9 to 2.0 mm Packaging Unit: 5 Pieces VVIO VDD O Article No: 82207BL Plugs with exposed 2 mm pins Covered alligator clips allow fitting unipolar terminals of PACE® Model 203 versatile connection Packaging Unit: 10 Pieces

PACE® Model 203 with unipolar terminals accepting pins of 0.9 to 2.0 mm

(order number: P/N 2002)

Reusable Extension Cable StimConnect™

Packaging Unit: 5 Pieces
